EDUCATION

University of California, Irvine | Irvine, CA

Sep. 2023 - June 2027

B.S. in Informatics, Human-Computer Interaction (HCI)

- Relevant Coursework: UI/UX Design, Machine Learning, Data Structures & Algorithms, Object-Oriented Programming, Databases, Machine Learning, Software Engineering Principles
- Involvement: UCI Digital Learning Lab, Design at UCI (Project Team), Women in Information Computer Science, VenusHacks, Hack at UCI

EXPERIENCE

Researcher – Irvine, CA

UCI Digital Learning Lab (previously Research Fellow)

June 2026 – Current

- Lead a team to redesign and elevate the programming & AI-literacy curriculum for the Computing and AI for All initiative, restructuring and polishing existing lessons while conducting user research with teachers, administrators, and district stakeholders and co-designing/usability-testing features of the CreatiCode platform
- Design and illustrate visual assets for a conversational-agent-based book and video platform built to support children's dialogic learning, shaping the platform's overall design perspective
- Code qualitative research data against structured frameworks and support data analysis for research publications across both projects

Graphic Design Intern – Irvine, CA

Hack at UCI

Dec. 2025 – Mar. 2026

- Designed & produced 10+ digital, print, and web assets for 3 of the largest collegiate hackathons in Orange County, reaching 1,000+ social media impressions
- Applied UI/UX principles and brand guidelines in Figma to design promotional graphics and social media content, contributing to increased event visibility and attendance
- Supported the co-hosted IrvineHacks hackathon that brought in over 300+ students all across the country

Dreams For Schools – Santa Ana, CA

STEAM Instructor

Aug. 2025 – Current

- Instructed 20+ K-8 students per session in foundational CS concepts using Scratch & Sphero, applying user-research thinking to tailor curriculum for diverse learning needs and ability levels
- Conducted iterative curriculum refinement with a team of 10+ instructors and coordinators, improving lesson engagement across in-person and virtual formats
- Adapted instructional materials for 2 distinct age groups, applying accessibility and inclusive design principles to maximize comprehension

PROJECTS

Cat Discovery App | React • REST API • Figma

CodePath 2026

- Built a React SPA that fetches live breed data from The Cat API and renders interactive breed cards, giving users full control to discover and filter content via a dynamic ban-list
- Managed component state with React hooks, ensuring real-time UI updates as users add or remove filter attributes

Spotify Browser | Angular • Node.js • Express • Spotify API • OAuth

User Interaction Software 2026

- Built a full-stack music browsing interface in Angular, consuming a [Node.js/Express](https://nodejs.org/en/express) backend that handles OAuth 2.0 authentication and Spotify API calls
- Designed search and cross-navigation flows across artists, albums, and tracks. Applying information architecture to keep complex, interconnected data explorable and intuitive

TECHNICAL SKILLS

Product & Research: User Research, Usability Testing, Co-Design, Requirements Gathering, Qualitative Coding, Spec Writing, Data Analysis

Design & UX: Figma, Adobe Illustrator, Adobe Photoshop, UI/UX Design, Information Architecture, Mobile UX

Front-End & Back-End: React, Angular, Ionic, JavaScript/TypeScript, [Node.js](https://nodejs.org/en/), Express, Python, Java, SQL, Database Design, RESTful APIs, OAuth

Cloud: & Workflow: AWS, Git/GitHub
