The Problem

Students and early-career professionals often struggle to communicate their experiences confidently in interviews, networking events, presentations, and workplace conversations.

- ✦ Even when users have relevant skills or experiences, they may not know how to explain them clearly, answer follow-up questions, or practice realistic professional scenarios before high-stakes moments.

Problem Statement

How can we...

empower students and job seeking individuals to build professional confidence through small, daily practice habits that prepare them for real-world career situations?

User Research Findings: Surveys

Out of 54 users surveyed...

72.2% of users avoid social or professional situations because of discomfort

90.7% of users wanted professional or combined social-professional speaking improvement

a majority of users wanted features such as progress tracking, personalized challenges, and a points/streaks system

User Research Findings: Interviews

Out of 8 users interviewed...

“A lot of it is just overthinking and not knowing how to start.”

“I avoided opportunities to network with individuals at events because I didn’t know how to relate to them.”

“I would use something that gives me clear actions and tells me how to improve.”

User Persona

Name: Maya Chen

Age: 21

Occupation: Current College Student

Background:

First-time internship applicant with interview anxiety.

Goals:

- Practice interview answers
- Build confidence
- Improve networking
- Stay career-ready

Frustrations:

- Preparation feels unrealistic
- Nervous with surprise questions
- Mock interviews feel intimidating
- Feedback feels harsh

Our Solution

At a Glance

Nudge is a **daily habit-building mobile app** that helps individuals develop professional confidence through **AI-powered practice rooms**, **daily challenges**, and **a streak-based/gamification motivation system**.

- **Key Feature #1**

Daily Challenges

Research showed that students struggle to build professional habits because practice feels overwhelming and inconsistent

★ **Solution:** low-staked daily challenges that reset every 24 hours make practice feel manageable, low-pressure, routine.

- **Key Feature #2**

Mock Interviews & Ai Feedback

Interview participants shared that they had no safe, judgment-free space to practice speaking before high-stakes professional situations.

★ **Solution:** AI-powered practice rooms simulate real interviews and conversations, giving users instant feedback on clarity, confidence, and pace.

- **Key Feature #3**

Friend Activity & Progress Tracking

Users reported feeling unmotivated to practice alone with no sense of accountability or visible growth over time.

Solution: Friend streaks, a social feed, XP leveling, and a progress page give users the visibility and peer accountability to keep coming back.

The wireframe illustrates a career coaching application with the following screens and components:

- 1. Sign up:** Includes a user icon, "create Account", and input fields for "Email", "Password", and a "Sign up" button.
- 2. Preferences:** Asks "What would you like to focus on?" with buttons for "Professional", "social", and "both".
- 3. Dashboard:** Displays "Good Morning!", a "Progress" bar, buttons for "Professional" and "social", a "5 day streak" with 5 dots, and a "Today's Challenge" box.
- 4. Professional Hub:** Features "Today's Challenge", "Interview Prep Rooms" with three empty slots, and a "social" button.
- 5. Social Hub:** Shows "Today's Challenge", "Social Made Rooms" with three empty slots, and a "social" button.
- 6. Challenge details:** Titled "Today's Challenge", it includes a challenge icon, "Why?", "I'm Done", and a "Skip" button.
- 7. Mock Interview:** Labeled "AI Mock Interview", it shows an interview icon, "Interview (AI)", a progress bar, and "Speak" and "End Room" buttons.
- 8. Feedback (after room):** Displays "Your Feedback", a score of "82", "Great Job!", and sliders for "Clarity", "Confidence", and "Pace", along with a "View suggestions" button.
- 9. Progress Page:** Titled "Your Progress", it includes an "Overview" button, "Level 4" with a progress bar, "5 day streak", "28 Challenges", "Weekly Progress" with a line graph, and "Badges" with icons.
- 10. Profile Page:** Shows a "Profile Page" with a user icon, "My Goals", "Friends", "Settings", "Help", and a "Log Out" button.

Navigation arrows connect the screens in a logical flow: Sign up to Preferences to Dashboard to Professional Hub to Social Hub to Profile Page. Additionally, there are arrows from the Dashboard to Challenge details, from Challenge details to Mock Interview, from Mock Interview to Feedback, from Feedback to Progress Page, and from both Professional and Social Hubs to the Progress Page.

User Testing & Heuristic Evaluation

10 moderated usability sessions - College students & Early-career users

10

Participants

78%

Task Completion

4/5

Satisfaction

01 Hub Restructure

issue

7/10 users confused Social vs. Professional Hub

change

Removed Social Hub entirely. Expanded Professional Hub with job listings, networking events, and opportunities discovery to focus on our core audience: college students.

02 Record Icon Redesign

issue

7/10 skipped speaking - tapped 'done' without recording

change

Redesigned mic icon with clearer placement, label, and affordance.

03 XP & Onboarding

issue

8/10 didn't understand XP or how it was earned

change

XP now earns profile titles and streak shields/savers so that progress feels personal, and missing a day doesn't feel punishing. Job-interest questionnaire + resume upload moved to onboarding so XP has meaning from day one.

04 Interview Controls

issue

5/10 wanted to retry individual questions

change

Added a redo button so users can retry individual questions without restarting the entire session. Lowering the stakes and encouraging more honest, repeated practice without the fear of starting over.

Reflection

- Many college students feel a less confident and less comfortable in professional situations
- Users appreciate clarity, personalization, and simplicity

Takeaways

- Simplified Nudge's platform by removing the Social Hub, which evolved Nudge into a career discovery and interview preparation platform

✦ What's Next.. ✦

Additional User Testing

- to gather more feedback to improve Nudge

Expand Professional Hub

- to give users more room options

Partnerships

- to provide more resources to better support students
